## DETAILED ACTION

### *Reasons for Allowance*

1. The following is an examiner's statement of reasons for allowance: the closest prior of art (Tillman et al U.S. patent no. 6,496,980 and Guedalia U.S. Patent No. 6,745,226) does not teach nor suggest in detail requesting a base quality version of the program from a server over the network, wherein the base quality version of the program comprises layer data of a layered unicast having hierarachially related layers n that the lowest layer is a base layer and each subsequently higher level layer adds enhancing information for enhancing the quality of the program that can be rendered from the layers preceding it in the hierarchy, and wherein requesting a base quality version of the program from a server over the network comprises requesting as many layers, in order of their position in the hierarchy starting with the base layer, as can be transmitted from the server to the client without exceeding the available bandwidth of the network in combination with all elements of the independent claims as argued by the Applicant (see paper March 12, 2007, page 13 and 14). So as indicated by the above statements, Applicants arguments have been considered persuasive in light of the claim limitations.

2. The dependent claims further limits the independent claims and are considered allowable on the same basis as the independent claims as well as for the further limitations set forth.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Claims 1-16, 18-27 and 35-36 are allowed.
